UPDATE ON STRATEGY<

FINANCIAL PERFORMANCE Q3 2023 <

2023 GUIDANCE <

Economic global growth forecast for 2023 retained at 3.0% regional divergences widen nonetheless

Global growth forecast for 2023 is expected to slow, potentially impacting Sub-Saharan Africa's economic prospects.

Inflation has moderated in response to prior monetary policy tightening. However, prices remain above the 2% comfort levels.

Central banks in advanced economies halted monetary policy tightening to preserve economic growth, keeping benchmark rates unchanged at elevated levels.

Kenya's domestic borrowing appetite continues to put pressure on interest rates despite declining inflation and we expect the KES to depreciate further

Kenya's Headline PMI posted at 47.8 with private sector activity illustrating broad weakness.

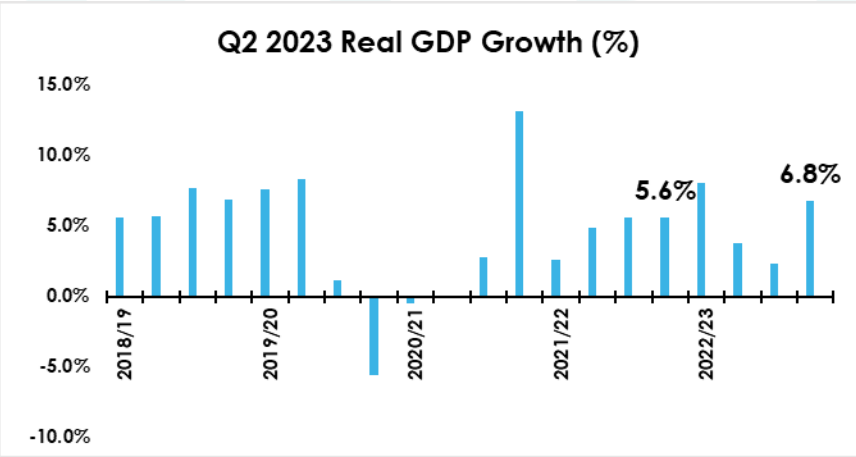

Inflation slowed to 6.8% owing to a combined decline in key foods items and moderating energy prices, however, risk persist. Yields on short-term securities continue to rally.

The KES is expected to remain weak. Year-to-date the shilling has weakened by 21%.

Macroeconomic conditions in the East Africa regional economies remain varied

Uganda’s economy expanded by 6.8% in Q2 2023 compared to 5.6% in the corresponding quarter last year.

Rwanda’s real GDP registered a 6.3% growth in Q2 2023, down from 7.5% in 2022. The RWF continues to gradually weaken.

In Tanzania, growth in Q1 2023 rebounded to 5.6% from 5.5% recorded Q1 2022. The TZS has depreciated despite continued BOT support.
